**“BUILDING FOUNDATION EDITION” MOVES BOLT STAR®  
ON TO SQUARE FORMS AND BUILDING FOUNDATIONS**

Sacramento, CA (December 5, 2017) – Bolt Star LLC, manufacturer of the award winning BOLT STAR reusable bolt template, will introduce its latest edition of BOLT STAR in booth #S13157 at the World of Concrete 2018 on January 23-26 in Las Vegas, Nevada.

The new product, called the BOLT STAR *“Building Foundation Edition,”* addresses the need for an efficient setup and accurate bolt template for setting four anchor bolts in square forms and building foundations. This new edition is specifically designed to address a variety of square or linear concrete form applications, including steel columns, building foundations and even square forms for light pole bases. The solution marries the award winning BOLT STAR reusable bolt template with the new EVOLUTION Adaptor which attaches to the BOLT STAR template. Similar to the Xtender™ adaptor for nested tube, the EVOLUTION Adaptor snaps on to the end of each BOLT STAR arm and can be used interchangeably with 18”, 24” or 30” BOLT STAR. Slots in the Adaptor are then used to secure the entire bolt template assembly to the form work using screws provided with the product. The new bolt template also incorporates cage tie slots to wire up a rebar cage, and has markings that can be used to automatically center the four anchor bolts within a square form opening.

The BOLT STAR *Building Foundation Edition* can be used on square forms or parallel form boards ranging in size from 15” to 27”. It will accommodate anchor bolts up to 1” diameter and

More . . .

square bolt patterns ranging in size between 5” and 10” which are marked on the template for fast, accurate setup. Line up bolts on pre-measured markings and bolts come out perfect every time. The BOLT STAR *Building Foundation Edition* is 100% manufactured in the USA from high-strength ABS materials.

“Concrete contractors have been asking for this product for quite some time, and we listened,” says Ken Gregory, President of Bolt Star LLC. “The BOLT STAR *Building Foundation Edition* takes the BOLT STAR product line to the next level, enabling the reusable bolt template, originally designed for round concrete forming tubes, to “evolve” to square form applications.” The BOLT STAR *Building Foundation Edition* templates are designed to be used over and over again with proper maintenance. Made in the USA, BOLT STAR reusable bolt templates improve construction efficiency by 57% and significantly improve the productivity of crews by eliminating the time consuming, repetitive and error prone practice of building wood bolt templates for setting bolts in concrete forms.

BOLT STAR received the prestigious NOVA Award for its contribution to construction efficiency, quality, safety and reducing construction waste. BOLT STAR also has won the Construction & Engineering Award from BUILD Magazine; the Product of the Year Award for Specialty Products from EC&M Magazine; and the Top Products Award from Electrical Products & Solutions Magazine.

## **About Bolt Star LLC**

Bolt Star LLC specializes in the manufacturing, marketing and distribution of innovative tools for the construction industry. Our goal is for every contractor to have tools that increase efficiency, quality and safety, and speed construction. Wherever possible we seek solutions that contribute to a better world by reducing construction waste. These tools are then distributed to contractors through Graybar, HD Supply/White Cap, and a nationwide network of independent distributors.
