**FOR IMMEDIATE RELEASE**

**JANUARY 26, 2018**

**"SQUARE FOUNDATION EDITION" MOVES BOLT STAR®  
ON TO SQUARE FORMS AND BUILDING FOUNDATIONS**

Sacramento, CA (January 26, 2018) – Bolt Star LLC, manufacturer of the award winning BOLT STAR reusable bolt template, introduced its latest edition of BOLT STAR in booth #S13157 at the World of Concrete 2018 on January 23-26 in Las Vegas, Nevada.

The new product, called the BOLT STAR "*Square Foundation Edition*," addresses the need for an efficient setup and accurate bolt template for setting four anchor bolts in square forms and building foundations. This new edition is specifically designed to address a variety of square or linear concrete form applications, including steel columns, building foundations and even square forms for light pole bases. The solution marries the award-winning BOLT STAR reusable bolt template with the new Evolution Adaptor which attaches to the BOLT STAR template. The Evolution Adaptor snaps on to the end of each BOLT STAR arm and can be used interchangeably with 18", 24" or 30" BOLT STAR, similar to the Xtender™ adaptor for nested tube. After positioning the template on the form, the bolt template assembly can be attached to the form work using screws provided with the product. The new Square Foundation template also incorporates cage tie slots to wire up a rebar cage. Markings on the Evolution Adaptor can be used to automatically center the four anchor bolts within a square form opening.

The BOLT STAR *Square Foundation Edition* can be used on square forms, spread footings or parallel form boards ranging in size from 15 inches to 30+ inches, depending on which BOLT

More . . .

STAR size is used. The product accepts anchor bolts up to 1" diameter and square bolt patterns ranging in size between 5" and 10" the latter being marked on the template for fast, accurate setup. The BOLT STAR *Square Foundation Edition* is 100% manufactured in the USA from high-strength ABS materials.

"Concrete contractors have been asking for this product for quite some time and judging by the response from concrete and general building contractors attending the World of Concrete 2018, the Square Foundation Edition is a home run," says Ken Gregory, President of Bolt Star LLC. "Hundreds of contractors dropped by our booth to see a demo and obtain additional information on this new innovative product. Contractors really liked that one BOLT STAR with the Evolution Adaptor now gives them a solution for either round or square forms." The BOLT STAR *Square Foundation Edition* product is scheduled for release in Summer 2018. All BOLT STAR templates are designed to be used over and over again with proper maintenance. Made in the USA, BOLT STAR reusable bolt templates improve construction efficiency by 57% and significantly improve the productivity of crews by eliminating the time consuming, repetitive and error prone practice of building wood bolt templates for setting bolts in concrete forms.

BOLT STAR received the prestigious NOVA Award for its contribution to construction efficiency, quality, safety and reducing construction waste. BOLT STAR also has won the Construction & Engineering Award from BUILD Magazine; the Product of the Year Award for Specialty Products from EC&M Magazine; and the Top Products Award from Electrical Products & Solutions Magazine.

## **About Bolt Star LLC**

Bolt Star LLC specializes in the manufacturing, marketing and distribution of innovative tools for the construction industry. Our goal is for every contractor to have tools that increase efficiency, quality and safety, and speed construction. Wherever possible we seek solutions that contribute to a better world by reducing construction waste. These tools are then distributed to contractors through Graybar, HD Supply/White Cap, and a nationwide network of independent distributors.
